

Dear Author,

By this time, you should have received a separate email from us regarding the review decision for your full paper.

Congratulations again for having your full paper being accepted for presentation at the upcoming 2017 International Workshop on Computing in Civil Engineering.

While you prepare for the camera-ready submission, we would like to provide you with a few guidelines to help you manage the process.

1. File format: Please note that the preferred file format for your full paper is MS Word.
2. Margin: The recommended setting specified in the ASCE Conference Paper Formatting Instructions should be one inch (1") on all sides. There is an inconsistency between the latent and modern guidelines from ASCE and we apologize for the confusion this might have caused.
3. Proceedings printing: The proceedings will be in digital only and your figures/graphs can be in color. However, please make sure the different colors are distinguishable if your figures/graphs are printed in grey-scale.
4. Due date: In consideration of the time needed to make your file in compliance with the above guidelines, we have extended the camera-ready submission due date to \*February 17, 2017\*.
5. Registration: Please note that each Standard Registration (\$750) will cover the publication of one accepted full paper ONLY, with the option to cover the publication of a second accepted full paper at an EXTRA FEE (\$400). This discounted option can only be applied once per Standard Registration paid. Deadline for the Standard Registration to cover the publication of full papers is \*March 3, 2017\*.

Please let us know if you have any questions!

Sincerely Yours,

Ken-Yu Lin, Chair, Organizing Committee, IWCCE2017

Pingbo Tang, Vice-Chair, Organizing Committee, IWCCE2017

Nora El-Gohary, Chair, Technical Committee, IWCCE2017
